CAREER ACCOMPLISHMENTS

- I made apps work with iBeacons and NFC cards, and built a special keyboard in Flutter.
- I learned Next.js to create REST APIs and used PostgreSQL for data management.
- I made apps track location in real-time with Google Map and added in-app purchases.

WORK EXPERIENCE

Developlogix   Islamabad, Pakistan

Flutter Developer   Jan 2023 – Present

- Successfully integrated iBeacons and NFC cards into Flutter apps for Android (Java and Kotlin) and iOS (Swift), despite being initially unfamiliar with these technologies.
- I developed a custom keyboard in Flutter, addressing the challenges of creating a unique and functional input method.
- Developed REST APIs using Next.js and PostgreSQL, gaining proficiency in Next.js during the process.
- Implemented Google Cloud Functions for enhanced app functionality.
- Successfully integrated in-app purchases using Revenue Cat.
- Implemented real-time Google Map tracking for location-based services.

Thermalog   Islamabad,

Android Developer   Apr 2022 – Dec 2022

- Developed and implemented Java background services to perform tasks efficiently and seamlessly in the background.
- Utilize Canva to create dynamic and visually appealing PDF documents, adding a unique touch to your projects.
- Integrated Kiosk Mode to create specialized and restricted user interfaces for specific applications
